# Hussain Muhammed

*Software Engineer*

hmuhammed9771@gmail.com 0779422535 Colombo, Sri Lanka hussain-muhammed h-muhammed
personal-portfolio

## Profile

Software Engineering with 2 years of professional experience building and deploying scalable mobile and enterprise web applications. Proven track record shipping production apps to iOS and Android, architecting secure payment workflows, and engineering ERP/cloud backends using Flutter, ASP.NET Core, and PostgreSQL

## Education

**BSc in Information Technology (Specializing in Software Engineering) | SLIIT 2022 – 2026**

## TOOLS AND TECHNOLOGIES

- **Programming:** Java, JavaScript, Python, Dart, PHP, C# (.NET)
- **Frameworks & Tools:** React, Flutter, Node.js, MERN, Express.js, Angular, Laravel, .NET WinForms
- **Databases:** Firebase, MySQL, MongoDB, PostgreSQL, Oracle, MSSQL, SQLite
- **DevOps & Cloud:** Docker, Kubernetes, GitHub Actions, Nginx, cPanel, AWS (MSSQL on cloud), VPS Hosting
- **Other Tools:** GitHub, Figma, Jira, XAMPP, Android Studio, Visual Studio Code, Jupyter Notebook, SSMS
- **Specialized Skills:** Microservices Architecture, RESTful APIs, Secure Authentication, Socket Programming, AES-256 Encryption, Role-Based Access Control, Real-Time Database Sync, Payment Gateway Integration

## Experience

**Associate Software Engineer American Premium Water System (2025 March - 2026 July)**

- Architected and deployed an end-to-end payment pipeline integrating Cybersource Secure Acceptance with ASP.NET Core and Flutter, handling customer outstanding balances with zero security vulnerabilities
- Built hosted checkout workflows with HMAC-SHA256 signature validation, webhook handling, and a pending → finalized payment lifecycle with audit logging and daily transaction sequencing.
- Currently developing a company-wide ERP system (AWMS) to support core business operations including customer account management, delivery planning, payments, and invoicing. Tech: Angular, Bootstrap, PostgreSQL

**Intern Software Engineer American Premium Water System (2024 August - 2025 March)**

- Selfcare Mobile App | 10/2024 – 10/2025

Shipped cross-platform enterprise selfcare application to the App Store and Google Play, digitizing invoice tracking and consumption logs for thousands of active accounts
*Technologies*: Flutter, ASP.NET Core, MSSQL, Azure,Firebase
[Live on App Store ] | [Live on Google Play ] | [Live Web App ]

- Business Card Reader - [Live ]
  Built a Python app using Google Vision API for OCR to extract data from business cards.Used SpaCy for structuring extracted data into organized formats.
  Frontend : React , Backend: Node js

## Projects

**AI-Based Speech Therapy Mobile Application (Research Project)**

- Developing an AI-driven speech therapy app with personalized therapy, pronunciation analysis, and gamified therapy sessions.
- **Tech:** Flutter, AI/ML (speech processing), Firebase / APIs,Node,React

[Live ] | [Github ]

**Masjid Management System**

- Developed a full-stack multi-tenant SaaS web application for mosque management, featuring member registration, payment tracking, donations, role-based access control, analytics, and printable letter generation.

[Live ]

**Food Ordering and Delivery System**

- Built a **full-stack platform** with user & driver mobile apps and an admin web portal.
- **Tech:** Flutter, Firebase, Node.js, React | Features: REST APIs, real-time notifications, Docker

[Github ]

**Textile Management System**

- Developed a management system with dynamic pricing and JWT-based role access control.
- **Tech:** React, Vite, Node.js, MongoDB

[Github ]
